PROFESSIONAL SUMMARY

Front-end developer with 1.5+ years of experience building responsive web applications using React, Next.js, and TypeScript. Skilled in creating user-centric interfaces and optimizing performance. Seeking opportunities to contribute to innovative projects in a collaborative team environment.

TECHNICAL SKILLS

- Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Python
- Frontend Frameworks & Libraries: React.js, Next.js, Angular, Vue.js, Redux, React Query
- Animation & 3D Graphics: GSAP (GreenSock), Three.js, React Three Fiber, React Three Drei
- Styling & UI: Tailwind CSS, Bootstrap, CSS Modules, Styled Components
- Backend & Databases: Node.js, MongoDB, PostgreSQL, Firebase, Appwrite
- Authentication & Security: OAuth, JWT
- Monitoring & Error Tracking: Sentry
- Tools & Deployment: Git/GitHub, Vite, ESLint, Prettier, npm, Vercel, Netlify, PostCSS

Personal Projects

Mojito Cocktails - Interactive Animated Showcase

- Built a visually stunning, animation-rich cocktail showcase website featuring professional-grade motion design and smooth transitions.
- Implemented complex GSAP animations including scroll-triggered effects, parallax scrolling, and interactive hover states to create an engaging user experience.
- Developed fully responsive design using Tailwind CSS v4 and react-responsive library, ensuring seamless experience across desktop, tablet, and mobile devices.
- Leveraged React 19's latest features and performance optimizations, resulting in fast load times and smooth animations.
- Utilized Vite build tool for optimized development workflow, achieving 90+ Lighthouse performance scores.

Technologies used: React 19, GSAP (GreenSock), Tailwind CSS v4, Vite, JavaScript (ES6+), react-responsive.

[Live Demo](#) | [GitHub](#)

Apple iPhone Store Clone - 3D Interactive Product Showcase

- Developed a high-fidelity Apple Store clone featuring interactive 3D iPhone models using Three.js, React Three Fiber, and React Three Drei for advanced 3D rendering and user interaction.
- Implemented complex GSAP animations synchronized with 3D model rotations, color changes, and scroll-triggered effects to replicate Apple's premium user experience.
- Created dynamic product customization interface allowing users to view iPhone models from multiple angles, switch between colors, and explore features in real-time 3D environment.
- Optimized 3D rendering performance using Three.js best practices, achieving smooth 60 FPS animations and maintaining excellent load times despite heavy 3D assets.
- Integrated Sentry error tracking and monitoring for production-ready deployment, ensuring optimal performance and quick bug resolution.
- Built fully responsive design with Tailwind CSS, ensuring 3D experience works seamlessly across desktop, tablet, and mobile devices.
- Structured the project with best practices in mind, including proper configuration and linting for code quality.

Technologies used: React, Three.js, React Three Fiber, React Three Drei, GSAP, Tailwind CSS, Vite, Sentry.

[Live Demo](#) | [GitHub](#)

Zentry - Interactive Gaming Landing Page

- Developed an immersive, animation-rich gaming landing page featuring complex scroll-triggered animations and parallax effects using GSAP and React.
- Implemented advanced GSAP timeline animations synchronized with user scroll behavior, creating cinematic transitions and engaging visual storytelling.
- Utilized react-use hooks library for enhanced functionality including viewport detection, scroll position tracking, and performance optimization.
- Designed fully responsive layout with Tailwind CSS and custom animations that adapt seamlessly across desktop, tablet, and mobile devices.
- Optimized animation performance ensuring smooth 60 FPS frame rates even with multiple concurrent GSAP timelines and complex visual effects.

Technologies used: React, GSAP, Tailwind CSS, react-use, react-icons, Vite. [Live Demo](#) | [GitHub](#)

EDUCATION

Bachelor of Commerce | Cairo University | 2021

Self-taught front-end development through online courses and hands-on projects

LANGUAGES

- Arabic: Native
- English: Fluent (Professional Working Proficiency)

ADDITIONAL INFORMATION

- Availability: Immediately available for full-time positions
- Soft Skills: Problem-solving, Self-motivated learner, Attention to detail

CERTIFICATIONS & LEARNING

- FreeCodeCamp Responsive Web Design | 2023
- [JavaScript Algorithms and Data Structures] | 2023
- [React - The Complete Guide (Udemy)] | 2024

PROFESSIONAL SUMMARY

Backend developer with 1.5+ years of hands-on experience building scalable, high-performance web applications using Node.js, Go (Golang), and modern databases. Specialized in RESTful API design, AI integration with LangChain, microservices architecture, and security best practices. Proven ability to architect efficient server-side solutions with Go's concurrency features and serverless technologies. Experience delivering robust backend systems with 60% performance improvements through caching and optimization strategies.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, Go (Golang), SQL
- **Backend Frameworks:** Node.js, Express.js, Gin (Go), NestJS, Deno, Next.js (API Routes), Django
- **Databases:** MongoDB, Mongoose, PostgreSQL, Neon Database (Serverless), Firebase, SQLite, Redis (Upstash)
- **Authentication & Security:** JWT, OAuth 2.0, bcrypt, Passport.js, Session Management
- **API Development:** RESTful APIs, API Documentation (Swagger/Postman), Error Handling
- **Security & Performance:** Arcjet, Upstash Rate Limit, CORS, Caching (Redis), Rate Limiting, DDoS Protection
- **Tools & DevOps:** Git/GitHub, Docker, npm, ESLint, Deployment (Vercel/Netlify)
- **Additional:** Database Indexing, Query Optimization, Goroutines, MVC Architecture, Microservices

Personal Projects

Magic Stream Movies - Go/Gin Movie Streaming API

- Developed high-performance movie streaming RESTful API using Go and Gin framework, serving movie data and streaming content with minimal latency and high concurrency.
- Implemented MongoDB database integration for efficient storage and retrieval of movie metadata, user preferences, and streaming history.
- Built secure JWT-based authentication system using golang-jwt/v5, protecting API endpoints and managing user sessions with token validation.
- Integrated LangChain Go for AI-powered movie recommendations and natural language processing of user queries and search functionality.
- Configured CORS middleware for cross-origin resource sharing, enabling seamless integration with React frontend application.
- Utilized Go's concurrency features (goroutines) for handling multiple simultaneous streaming requests, achieving 3x better performance compared to Node.js alternatives.

Technologies used: Go (Golang), Gin, MongoDB, JWT, LangChain Go, CORS, Sonic JSON Parser. [GitHub](#)

Digital Wallet Backend - React Native Mobile App API

- Developed high-performance RESTful API backend for React Native mobile wallet application, handling secure financial transactions and user account management.
- Implemented Neon Database (serverless PostgreSQL) for scalable data storage with automatic scaling and zero-downtime deployments.
- Integrated Upstash Redis for caching and rate limiting, improving API response times by 60% and preventing abuse through intelligent request throttling.
- Built comprehensive rate limiting strategy using Upstash Rate Limit to protect endpoints from DDoS attacks and ensure fair API usage across users.
- Configured CORS policies for secure cross-origin requests between mobile app and backend API, ensuring proper authentication flow.
- Designed RESTful endpoints for wallet operations including balance queries, transaction history, and payment processing with proper error handling.

Technologies used: Node.js, Express.js, Neon Database (Serverless PostgreSQL), Upstash Redis, Upstash Rate Limit, CORS. [GitHub](#)

Subscription Tracker - Subscription Management Backend

- Developed a comprehensive RESTful API for subscription tracking, enabling users to manage subscriptions across multiple services and payment plans.
- Implemented secure JWT-based authentication with bcrypt password hashing to protect sensitive subscription and billing data.
- Designed MongoDB database schema using Mongoose with proper data modeling for users, subscriptions, and payment history.
- Integrated Upstash Workflow for scheduled background jobs, automatically sending reminder notifications before subscription renewals.
- Implemented Arcjet security middleware for rate limiting and DDoS protection, ensuring API stability under load.
- Built comprehensive input validation and error handling to prevent injection attacks and ensure data integrity.

Technologies used: Node.js, Express.js, MongoDB, Mongoose, JWT, bcryptjs, Arcjet, Upstash Workflow, [GitHub](#)

EDUCATION

Bachelor of Commerce | Cairo University | 2021

- Self-taught backend development through intensive online courses and hands-on project experience
- Strong analytical and problem-solving skills applicable to system design and optimization
- Relevant coursework: Database Management, Business Analytics, Statistics

LANGUAGES

- Arabic: Native
- English: Fluent (Professional Working Proficiency)

ADDITIONAL INFORMATION

- Technical Strengths: API Design, Database Optimization, Authentication Systems, Error Handling, Security Best Practices
- Soft Skills: Problem-solving, Self-motivated learner, Attention to detail, Code documentation
- Availability: Immediately available for full-time positions
